

# DRIPASSIST™ veterinary Infusion Rate Monitor

Easy  
Reliable  
Affordable

## Make every drop count in your canine blood transfusions.

DripAssist turns your gravity drip set into a powerful transfusion tool that combines the highest level of cell viability with continuous and precise monitoring.

**DripAssist helps you accurately monitor the rate and volume of RBC transfusions without a pump.**

### Know how much you've administered

Displays total volume transfused

### Carefully monitor your transfusion rate

Calculates and displays drip rate to ensure accuracy

### Eliminate the need for frequent checks

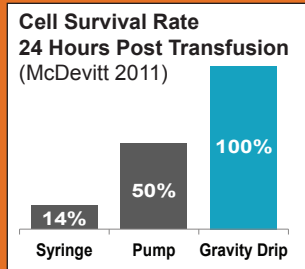

Optional alarm when flow rate changes or bag is empty

- No calibration or maintenance
- Uses one AA battery
- Learn in less than five minutes

Transfusion by pump or syringe can result in RBC damage.

Monitored gravity delivery is the most effective option.

Emerging research shows that mechanical delivery of RBCs is associated with a high risk of cell damage and loss.
